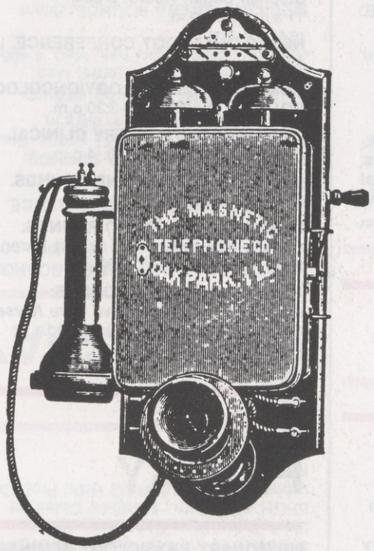
Vol. 11 No. 14, July 20-Aug. 16, 1985

TODAY & TOMORROW

JULY 20-AUG. 16, 1985



UCSF's entire telephone system, including Hospitals and Clinics, will be changed in two phases later this summer. The first phase starts with a cut over on Friday, September 6, at 10:15 p.m. At that time:

- The telephone prefix 666 will change to 476. LPPI's prefix will change from 681 to 476.
- To dial any campus number, use 6 and the present four digits. To dial any LPPI number from within the campus use 67 and the present three digits.
- SFGH, CED, VAMC, UCSF-Laurel Heights and other off-campus locations with 666 also will switch to 476 and continue to have the same four-digit extension. Use 6 and the present four digits when dialing on campus.
- To dial off-campus numbers in the 415 area code, dial 9 plus seven-digit number.
- To dial off-campus numbers in other area codes, dial 9 plus area code plus seven-digit number.
- UCSF no longer will use the "6" or "8" access codes or the special systemwide campus access numbers listed in the directory.
- To transfer calls, depress the switch hook button once. Wait for dial tone. Dial the new telephone number. Wait for ring. Replace the handle.

Phase II will begin immediately following the cut over in September:

- Rotary phones will be exchanged for new push-button phones. This will be done in phases over a period of three months. Each department will be contacted to discuss their individual equipment needs.
- Once the push-button phones are in place, a variety of special optional features will be available, including call forwarding and speed dialing. These options will be discussed with departments at the time of the preplanning.

All Hospitals and Clinics areas also will change to the 476 prefix and keep the present four digits.

- Hospitals and Clinics' new main telephone number will be 476-1000, separate from the main campus number of 476-9000, and will be handled by operators located in Moffitt lobby. They also will have the responsibility of overhead page, fire, Code Blue and answering service functions.
- All new telephone instruments for the hospitals will be installed on a per-building basis during October and November.

For further information on the new phone system call Irene Holland at x1581 or Mas Sugiyama at x2548. Questions regarding Hospitals and Clinics should be directed to Marty Gustafson at x4073.

This change in telephone numbers will require updating of stationery and business cards for campus departments and individuals. To avoid delays and production jam in Publications and Reprographics, please submit your orders immediately following your departmental preplanning meeting. UCSF logo stationery and business cards are handled by Publications. Systemwide stationery and business cards should be sent to Reprographics.

Most UC staff employees *not covered* by collective bargaining will receive a general 6.5 percent salary increase effective July 1, 1985. The increase is in addition to any July merit increases employees also may be receiving. Health care job classes in the hospital will receive salary adjustments which may be greater or less than the general increase, based on local market rates and recruitment and retention needs.

The salary adjustments are made possible by the Governor's approval of the State Budget Act for 1985-86, which provides a combined increase of up to 7.5 percent in salaries and benefits for UC staff employees. Of the 7.5 percent increase in State funds, 6.7 percent is earmarked for salary improvements and 0.8 percent for maintenance of existing benefits programs.

The majority of nonexclusively represented staff will receive a general 6.5 percent range increase. The 0.2 percent remaining for staff salary adjustments will be used to provide additional special increases in job classes where salaries lag behind the prevailing market and there are pressing recruitment and retention needs.

Employees receiving the general increase can expect to see the change in their August 1 paychecks for those paid monthly, and earlier for those paid on a bi-weekly basis, effective with July earnings. Special increases also are effective with July earnings, but will appear in employees' paychecks after August 1.

With regard to future increases, the University has received an indication from the State that a salary/benefits package of up to 6 percent (5 percent for salary adjustments and 1 percent to maintain current benefits) may be available for UC staff employees next year, which would be effective July 1, 1986.

Salary adjustments for employees covered by collective bargaining contracts are subject to negotiation between the University and the respective unions. Such negotiations are currently in progress. Further detailed salary increase information will be available as soon as the campus receives this information from the Office of the President.

• July 29-Aug. 2: At Embarcadero Center on Drumm St. between Clay & Sacramento.
• Aug. 3-9: In the parking lot of the UCSF-Laurel Heights site, 3333 California St. near Laurel shopping center.
• Aug. 12-16: UCSF, Parnassus Ave.

MOBILE BREAST SCREENING SCHEDULE

Women now can have low-cost mammograms—x-rays to screen for breast cancer—from a mobile van that travels to convenient shopping or downtown locations in San Francisco and remains for a week at a time.

Women need the approval of their physicians to have the mammogram. The procedure takes approximately 20 minutes, and costs only $30. To make an appointment call x4158 between noon and 3:30 p.m.

The van will be at the following locations for the next four weeks:

- July 22-26: Near the Lick Supermarket on 7th Ave. between Clement & Geary.
- July 29-Aug. 2: At Embarcadero Center on Drumm St. between Clay & Sacramento.
- Aug. 5-9: In the parking lot of the UCSF-Laurel Heights site, 3333 California St. near Laurel shopping center.
- Aug. 12-16: UCSF, Parnassus Ave.

NEWS BRIEFS

UC researchers have been awarded almost $4.7 million in state funds to continue studying AIDS, including $1,819,522 to support 25 UCSF proposals.

Most of the money will be used to fund projects spanning the entire range of AIDS research, from the basic science of how the virus works to the cost of caring for an AIDS patient, said Merle A. Sande, MD, UCSF professor and vice chair of medicine, who is chair of a UC task force charged with allocating the state funds. Sande also is chief of medical services at SFGH.

The UCSF Parent Support Group hosted a reception on June 21 to dedicate the new Parent Room in the remodeled Intensive Care Nursery in honor of Charlotte Green, MSW.

Green was a member of the social work staff from 1974 to the time of her death in 1981. She was responsible for the concept of the Parent Support Group, which consists of parents who have had babies hospitalized in UCSF's ICN. A long-time dream of Greens, now come to pass, was the new Parent Room—a place where parents can be alone with their babies.

Roderic Phibbs, MD, director of the ICN, hosted the reception with Laura Repke, the new coordinator of the Parent Support Group. A plaque, dedicating the Parent Room in honor of Green, was presented to Helen Archer-Duste, head nurse of the ICN.

The Support Group's newly published *Handbook for Parents* also was introduced at the reception. Designed as an informational resource for parents of criticallly ill newborns, the handbook will be given to all parents who have infants in the UCSF ICN. Articles ranging from the emotional stress on parents to technical questions regarding medical terms and procedures were written by members of the Support Group and ICN nursing and medical staff.

UCLA neurologist Jerome P. Engel, Jr., MD, will inaugurate a new Department of Neurology Robert B. Aird Lecture Series in the Clinical Sciences on Wednesday, August 7, at 4:30 p.m. in Room S 664.

A major contributor to the study of epilepsy by using positron emission tomography, Engel will discuss "Local Metabolic Correlates of Clinical and Experimental Epilepsy." Engel also will present Neurology Grand Rounds the following day at 11 a.m. in Room S 664. His topic will be "Surgical Treatment of Medically Intractable Partial Epilepsy."

The UC Board of Regents has approved the name UCSF-Laurel Heights for our new campus site at 3333 California Street. Planning for the major UCSF occupancy is still going on and the campus soon will prepare a full Environmental Impact Report (EIR). As part of this process, there will be a public informational meeting on Thursday, August 8, at 7 p.m. at the Laurel Heights site in the auditorium, and another to be scheduled this fall. A public hearing will be held sometime in the spring.

The EIR will cover the long-range plans of UCSF occupying the entire building.

At present, the only UCSF programs to be relocated are the Labor Relations Department (already moved, telephone extension 3905 remains the same) and four other administrative units to move by the end of the year: Personnel Office (except Rehabilitation), Affirmative Action, Transportation Office and Administrative Information Systems. A small administrative office overseeing the moves is located there now at 346-3580.

A shuttle service will be initiated at the UCSF-Laurel Heights campus to allow quick and easy access to and from the Parnassus campus when more of the UCSF activities have been relocated.

The new Cardiopulmonary Resuscitation Center (CPR) is open in Room 229 in the School of Nursing building. The center coordinates all campus basic life support programs for medical and nonmedical staff, including:

- initial certification classes for medical, dental and pharmacy students;
- physician and nurse recertification refresher courses including OR, emergency, PAR and ambulatory care staff;
- specific programs for campus police, radiology technicians, respiratory and physical therapists.

Two new programs are planned for staff employees later this year—Save-A-Heart CPR Course and First Responder Program in Emergency First Aid.

The CPR Center also will coordinate two Advanced Cardiac Life Support courses, one in November of this year and another in March of next year. For further information on CPR activities call x1817.

Aviva Y. Cohen, assistant clinical professor, anesthesia, has been appointed acting director of the CPR Center in the absence of Michael Cahalan for the 1985-86 academic year. Brigid Doyle serves as associate medical director and Vice Chancellor Thena Trygstad oversees the CPR program administration.

The UC Regents met on the UCSF campus for the first time in five years on Thursday and Friday, July 18 and 19, as part of their rotating schedule to visit each of the nine UC campuses.

UCSF faculty members Neal Castagnoli, Ira Herskowitz, A.J. Hudspeth, Joseph LaDou, Jay Nadel, Robert Schindler and Francis A. Sooy made presentations covering such topics as cellular and molecular biology, toxicology, environmental research and the development of the cochlear implant.

A reminder to the campus community: The city will begin repaving Parnassus Avenue and Judah Street on Saturday, July 20, from 9th Avenue to Clayton Street. The project is scheduled to be completed no later than August 30.

In order to minimize traffic problems on our campus, Parnassus and Judah will be repaved between 5th Avenue and Willard Street only on the weekends of July 27 and 28 and August 3 and 4. All other areas of Parnassus and Judah will be repaved during the weekdays, 7:30 a.m. to 4:30 p.m.

The campus community is urged to avoid Parnassus Avenue during this time period because it will be extremely congested. One lane of traffic will be open in each direction, however, parking will not be allowed. Vehicles parked on Parnassus or Judah during this period will be ticketed and towed.

The entrances to Moffitt/Long Hospitals, Medical Center Way and the Millberry Union parking garage will remain open at all times with short delays expected. For further information contact Bob Axelson at x2911.

Attention Forty-Niner Fans!!!! The Department of Radiation Oncology will be showing the San Francisco Forty-Niners Super Year highlights film daily from Wednesday, July 24, to Wednesday, July 31, noon to 1 p.m. in Cole Hall.

Sponsored by the Friends of Radiation Oncology, the event will include a representative from the Forty-Niners management at the July 24 showing. Cost will be $5 faculty and staff, $2.50 students. All proceeds will benefit the Department of Radiation Oncology. For further information contact Miles Hamada at x2461.

The UCSF Surplus Department has the following items available for sale to campus departments and the general public:

- 1977 Dodge Van, 15-passenger with handicap lift (van needs work),
- Analogic data 6000 wayform analyzer, computerized with floppy disks,
